

# How To Streetboard

**1**  
**In box:** (Depending on purchased package) Streetboard, Training tool (bag), Griptape, Bindings & Binding Bolts, **Required tools:** Oil, Screwdriver, Scissors, 6mm Allen Key, 4mm Allen Key, Adjustable Spanner

**2**  
**a:** Oil PivotSystem  
**b:** Slightly Tighten truck bolts: with 4mm key  
**c:** Slightly Tighten PivotSystem with 6mm key & Spanner: deck must still move smoothly  
**d:** Stick Griptape on foot deck

**3**  
 The Plastic instructions bag also contains the Training tool (Zip-Tie)  
**a:** Loop the Zip-Tie through the deck holes & around the neck of the board as shown  
**b:** Push the ends of the ZipTie together  
**c:** Pull the ZipTie tight on the top deck of the board and cut the extra bit away

**4**  
**a:** Imagine twisting your body around a pole (as shown) with your arm swinging across body  
**b:** Twist in the other direction with arm away  
**c:** Stand on the board with feet over large washers

**5**  
**a:** Swing arm above front foot across body & turn the front foot deck in with your foot at same time  
**b:** Swing your arm away from body while turning foot out at same time as shown in close up  
**c:** Twist your body as in step 4 while repeating steps a & b (above) and the board will move slowly forwards

**6**  
**a:** Ride just as before twisting arm across body but now also twist both feet inwards  
**b:** Move arm away from body while also twisting both feet outwards  
**c:** Repeat until linking turns and moving faster

**7**  
**a:** Take your shoe and measure it against foot deck holes pressing bolts UP from base of board as shown in close up (b)  
**b:** place binding through bolt and hold down with washer then nut as shown in close up  
**c:** Shows finished binding with shoe in straps

**8**  
**In steps (a-e) Neil is riding and linking turns. This is called carving & it is what makes the streetboard move. The faster you link these turns the faster you will move. With practice these carves can make you speed up or slow down or even ride up hill! Try it out!**

**9**  
**Now you have bindings try a basic straight jump**  
 Ride straight & jump with body weight balanced, lifting front foot first.

To stop: turn board quickly sideways and make a sitting position to break the speed
